# **Unix Assignment Questions**

## **Basic File Operations:**

- **Q1:** Create a new directory called project in your home directory. Inside the project directory, create two subdirectories named src and bin.
- **Q2:** Create a text file named notes.txt in the src directory and add some text into it using the echo command. Display the contents of the file.

Answer 1,2:

```
MINGW64:/c/Users/HP/desktop

HP@LAPTOP-JAP24849 MINGW64 ~ (main)
$ cd desktop

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ mkdir -p project/src project/bin

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ echo "This is my first notes file." > ~/project/src/notes.txt

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ cat ~/project/src/notes.txt
This is my first notes file.

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$
```

# 2. Working with File Permissions:

- Q3: Create a file named data.txt. Set the permissions so that:
  - The owner can read and write.
  - o The group can read.
  - Others have no permissions.
- **Q4:** Change the permissions of data.txt to be readable, writable, and executable by everyone.

```
MINGW64:/c/Users/HP/desktop

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ touch data.txt

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ chmod 640 data.txt

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ chmod 777 data.txt

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ chmod 777 data.txt
```

# 3. File Searching and Manipulation:

- **Q5:** Using the find command, search for all .txt files in your home directory.
- Q6: Find all files in the /etc directory that were last modified in the last 7 days.
- **Q7:** Use the grep command to search for the word "error" in the /var/log/syslog file. Display the lines where this word occurs.

#### Answer 5, 6, 7:

```
**MINOWARD JOBS AND THE STATE OF THE STATE O
```

```

```

## 4. Text File Operations:

• **Q8:** Display the contents of a file report.txt line by line using the cat, more, and less commands.

```
MINGW64:/c/Users/HP/desktop

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ echo -e "Line 1: Project Overview\nLine 2: Objectives\nLine 3: Timeline" > report.txt

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ cat report.txt
Line 1: Project Overview
Line 2: Objectives
Line 3: Timeline

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ head -n 10 log.txt
head: cannot open 'log.txt' for reading: No such file or directory

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ more report.txt
bash: more: command not found
```

```
Line 1: Project Overview
Line 2: Objectives
Line 3: Timeline
reports to (CMD)
```

• **Q9:** Use head and tail commands to display the first 10 and last 10 lines of a file named log.txt.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ for i in {1..20}; do echo "Log line $i" >> log.txt; done

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ head log.txt
Log line 1
Log line 2
Log line 3
Log line 4
Log line 5
Log line 6
Log line 7
Log line 8
Log line 9
Log line 9
Log line 10

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ tail log.txt
Log line 11
Log line 12
Log line 13
Log line 14
Log line 15
Log line 16
Log line 16
Log line 17
Log line 18
Log line 19
Log line 19
Log line 20

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ |
```

 Q10: Create a file named names.txt containing a list of names. Use sort to display the names in alphabetical order.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ echo -e "Ananya\nKuhu\nStuti\nDhwani" > names.txt

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ cat names.txt
Ananya
Kuhu
Stuti
Dhwani

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ sort names.txt
Ananya
Dhwani
Kuhu
Stuti
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
```

• Q11: Use the wc command to count the number of words, lines, and characters in a file data.csv.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ echo -e "Name,Age,City\nAnanya,22,Delhi\nRavi,25,Mumbai\nMeera,21,Bangalore" > data.csv

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ wc data.csv
4 4 64 data.csv

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
```

## 5. Process Management:

Q12: List all running processes using the ps command.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
 ps aux
                                                                              UID STIME COMMAND
197609 23:17:17 /usr/bin/less
197609 19:22:17 /usr/bin/mintty
197609 19:57:22 /usr/bin/less
197609 19:22:18 /usr/bin/bash
197609 23:37:33 /usr/bin/ps
        PID
                    PPID
                                 PGID
                                                WINPID
                                                                TTY
       1482
                    1241
                                  1482
                                                  20084
                                                              pty0
                                  1240
       1240
                         1
                                                  43432
                                                  41212
       1477
                    1241
                                  1477
                                                              pty0
       1241
                    1240
                                  1241
                                                  24324
                                                              pty0
                                                              pty0
       1594
                    1241
                                  1594
                                                  40312
```

## 6. System Information:

• Q13: Display the current date and time using the date command.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ date
Sat Jun 21 23:38:06 IST 2025
```

• Q14: Use the df command to display disk space usage.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)

$ df -h

Filesystem Size Used Avail Use% Mounted on

C:/Program Files/Git 261G 202G 60G 78% /

D: 215G 2.1G 213G 1% /d

HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
```

• Q15: Use the uname command to display your system's information (e.g., OS type, version).

```
P@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
uname -a
INGW64_NT-10.0-26100 LAPTOP-JAP24849 3.4.10-bc1f6498.x86_64 2024-09-15 15:08 UTC x86_64 Msys
```

• Q16: Display the current system uptime using the uptime command.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)
$ cat /proc/uptime
1140440.07 746911.60
```

#### 7. Network Commands:

• Q17: Use the ping command to check if a remote server (e.g., google.com) is reachable.

```
HP@LAPTOP-JAP24849 MINGW64 ~/desktop (main)

$ ping amazon.com

Pinging amazon.com [205.251.242.103] with 32 bytes of data:

Reply from 205.251.242.103: bytes=32 time=318ms TTL=243

Reply from 205.251.242.103: bytes=32 time=436ms TTL=243

Reply from 205.251.242.103: bytes=32 time=386ms TTL=243

Reply from 205.251.242.103: bytes=32 time=410ms TTL=243

Ping statistics for 205.251.242.103:

Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),

Approximate round trip times in milli-seconds:

Minimum = 318ms, Maximum = 436ms, Average = 387ms
```

 Q18: Use the ifconfig or ip a command to display the network configuration of your system.

 Q19: Display the active network connections using the netstat command.
